

Rolling with the Waves

2-5 Players • Ages 12+ • 20-45 Minutes

By Karl Lange © Ark Angel Games 2020

Welcome, captain! Before you lies everything you need to outsmart your adversaries on the high seas!

Whether recruiting crew, burying treasure, loading cannons to steal from others, or raiding ports, all options are open in your goal to collect the most treasure.

Rolling with the Waves is a roll & write game. During the game, you will be rolling dice and writing their values onto your player board to unlock or trigger abilities.

Components

- 5 Pirate Maps
- 5 Mini Boards
- 5 Ship Screens
- 5 dry erase markers
- 25 Crew Dice, 5 of each colour
- 6 clear Freebooter Dice
- 1 dice bag

Setup

- Each player takes a Pirate Map, mini board, Ship Screen, and a dry erase marker. Sit the mini board closest to you with the ship screen around it, then place the Pirate Map in front of your screen.
- Each player starts with 5 **Infamy** on their Map. Colour in the first 5 circles in the Infamy section of your Pirate Map, ready to spend.
- Place 2 dice of each player's colour in the dice bag.
- Place one clear freebooter die in the dice bag plus an additional die for each person playing (*i.e. players + 1 Freebooter Dice*).
- Place the rest of the dice to the side to be accessed later.
- The player who was most recently on a boat becomes goes first. Hand them the dice bag.

2 Player setup (top down):

Gameplay

Rolling with the Waves is played over a number of rounds. Each round consists of the following phases:

1. Draft Dice (*in player order*)
2. Allocate Dice (*simultaneously*)
3. Write Values and Trigger Actions (*simultaneously*)
4. Drop Anchor (*Cleanup*)

1. Draft Dice

The first player draws 3 dice per player from the bag and rolls them (*e.g. If there are 4 people playing, draw 3 dice x 4 players = 12 dice*).

Starting with the first player and continuing clockwise, each player picks 1 die from the pool, following these rules:

- You may pick a clear die (*Freebooter Dice*)
- You may pick a die of your colour (*Crew Dice*)
- You may pick another player's crew die by spending Infamy equal to the die value to convince that crew to join you for this round.

Erase spent Infamy from your Pirate Map.

Infamy is indicated by filled pips. To spend Infamy, erase the number of pips spent.

If there are no clear dice or dice of your colour left to draft, and you don't have enough Infamy to draft another player's dice or don't wish to spend your Infamy, you must take a drunken sailor. Pick any die from the pool and change it to a .

As you draft each die, place it in the crow's nests at the top of your Pirate Map for all other players to see.

Players continue taking turns drafting dice until each player has 3 dice.

2. Allocate Dice

Now is the time to put your Crew to work! All players simultaneously allocate their 3 dice from their crew's nests to the mini Pirate Map behind their screen in secret:

- Only 1 die may be allocated to each icon, each round (*e.g. you may allocate only 1 die to Hire Crew each round, but may allocate a die to each Chest as they are 3 separate icons*).
- The colour of the dice is not important.
- To Bury one of your 3 treasure chests, you must allocate **all** 3 dice drafted this turn, irrespective of value.
- Once you have allocated your dice, let others know with a hearty '**YARRR!**'

3. Write Values & Trigger Actions

Once everyone has allocated all their dice, players simultaneously reveal their mini board. Players then write values onto their Pirate Map and resolve any triggered actions together, from left to right on the mini board.

As players allocate a value from their mini board to their map, they may modify the value of the dice with Raise Spirits (*see below*).

i. Raise Spirits

Struggling to keep up with the big guns? Try raising your crew's spirits to change your luck!

To allocate: Write the number shown on the die in an empty square.

To use: If you have 2 dice allocated to your **Raise Spirits** (*irrespective of the number*), you may spend them to Raise your Spirits!

As you allocate a die from your mini board to your Pirate Map, you may erase both numbers from Raise Spirits to write a  (7) instead of the drafted value.

Raise Spirits

2	1
---	---

The numbers allocated to Raise Spirits are not important, just that there are 2 dice allocated to it.

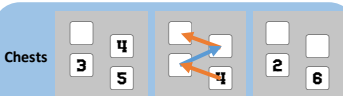

ii. Fill Chests

As a pirate, treasure is your main source of income (*points!*). You have 3 chests that you can fill, and **Bury** (*see Buried Treasure below*) to protect from others who may be looking to loot your plunder!

Chests should be filled from the bottom right, to top left (from the bottom of the chest up).

To Allocate: Write the number in the next available square.

You may allocate 1 die to *each* of your unburied **chests** per round (as indicated by the icons).

Chests should be filled from bottom to top as shown by the arrows above. Because of this, you can protect valuable treasures by placing smaller values on top.

Until a chest is **buried**, it can be stolen from. Once buried, that chest can't be added to.

iii. Bury Treasure

Burying a treasure chest on a desert island is no small feat. To **Bury Treasure**, you must spend all 3 dice drafted this turn, irrespective of value, to bury a chest.

Cross out the map below the chest you wish to bury and draw a box around the buried chest to show all players it is now safe.

There must be at least 1 die in a chest for it to be buried.

At the end of the game, for each chest buried this way, you earn 2 bonus points for your effort.

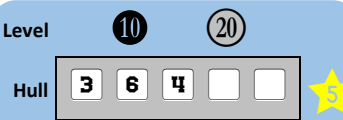

iv. Hull

Protect your treasure with a thicker Hull. Each **Hull Level** you earn blocks 1 shot when you are fired upon by other players, preventing treasure being stolen from your unburied chests.

To allocate: Write the number shown on the die in the next available square.

Once the sum of allocated dice is equal to or greater than the number in the circle you have earned that level, colour in the circle in to indicate your new **Hull Level**.

If you have filled all 5 **Hull** squares by the end of the game (irrespective of levels met), you earn a bonus 5 points.

This player has a total of 13 in their Hull. Therefore their Hull level is 1.

v. Fire Cannons

Each ship is equipped with 2 cannons that allow you to steal unburied treasure from other pirates on the seas!

Dice are allocated and levels earned the same way as described in **Hull**.

You may allocate 1 die to *each* cannon each round (*as indicated by the icons*).

Cannons fire on the round they are filled, so time your allocation wisely.

If more than one cannon is firing in a round, the player with the highest **Infamy** shoots first, then second-highest **Infamy** and so on. In case of a tie, the player nearest to the left of the first player fires first.

To fire your cannon(s), pick a player and select 1 of their unburied chests to steal from. If you fire more than 1 cannon at a single player, you may only pick 1 chest, but may steal more treasure from it. You may target a different player with each cannon firing.

When stealing treasure, you must steal from the top left of the chest, moving down to the bottom right (*opposite to filling, see Fill Chests*). You can't just rummage around in the chest for the best prize!

If the targeted player has a **Strengthened Hull**, they block 1 die from being stolen per **Hull Level**. Hull is never removed (*Example: Alex takes 3 shots at Sam. Sam has a level 2 Hull, so blocks the first 2 shots. Alex can take the topmost treasure from 1 of Sam's unburied chests*).

Stolen treasure is wiped off the targeted player's board and written into a single unburied chest on your map as per the standard placement rules. You must place the stolen treasure in your chest in the order you took them (*e.g. if Alex stole a 2 then a 6 from Sam, Alex must place the 2 in a chest first, then the 6 next*). If you don't have room in a chest to place your stolen treasure, you lose any treasure that doesn't fit.

Finally, the player firing gains **Infamy** equal to the lowest die in the cannon and erases all values from the cannon, ready to be loaded again on subsequent turns.

Shots	4	7	10	3	6	9	15
Powder	6			3	4	3	

*Alex filled the large cannon this turn.
Alex will take 3 shots at Sam as indicated
by the shots row.
Alex will then gain 3 infamy, as it is the
lowest die in the cannon, and wipe the
cannon clean, ready to reload next round!*

vi. Raid Ports

Raiding Ports gains you Infamy each round. The more ports you have raided, the more infamous you will become!

Dice are allocated and levels earnt the same way as described in **Hull**.

Each round, all players gain Infamy equal to their **Ports Raided level**. Additionally, the player with the greatest sum of **Ports Raided** (values in squares) gains 1 extra Infamy each round.

To add Infamy, simply colour in a circle for each Infamy earnt.

As with Hull, if you fill all 5 **Raid Ports** squares by the end of the game, you earn a bonus 5 points.

Alex:

Level	3	10	18
Ports raided	6	6	

Sam:

Level	3	10	18
Ports raided	3	3	3

Alex has a sum of 12 Ports Raided, where Sam has only 9.

Alex will Gain 3 Infamy this round (2 for their level + 1 additional for being the most infamous) and Sam will gain 1

vii. Hire Crew

Hiring Crew adds more of your dice to the dice bag during the draft phase.

Dice are allocated and levels earnt the same way as described in **Hull**.

On the round you earn a new **Crew Level**, add an extra die of your colour to the dice bag.

As with **Hull**, if you fill all 5 **Crew** squares by the end of the game, you earn a bonus 5 points.

Level

5	11	19
---	----	----

Hire Crew

3	5	4	1	3
---	---	---	---	---

This player has filled all the Hire Crew dice spaces, so will earn 5 bonus points at the end of the game.

4. Drop Anchor

The **Drop Anchor** phase consists of the following actions:

- Check for endgame conditions (*below*). If the game hasn't ended:
- Put all dice back into the dice bag.
- Pass the bag 1 player to the left. They are the first player for the next round.

Endgame Conditions

The game ends when either of the following conditions have been met at the end of a round (*the endgame conditions are marked with a gold skull & crossbones on the Pirate Map*):

- A player has 3 Treasure Chests **Buried** and/or **Filled**
- OR
- A player completely fills all their **Raided Ports**, **Hire Crew** & **Hull** (*irrespective of numbers or level reached*)

Players then tally their scores. Points are scored for the following:

- Points equal to all the treasure you have (*both buried and unburied*)
- Bonus points for completing certain parts of your map (*see Parts of the Map*)
- 1 point for every 3 unspent Infamy

The winner is the player with the most points!

If there is a tie, the player with the most Infamy remaining is the winner.

<p>Infamy</p> <p>Spend 1 Infamy equal to the value of an opponent's crew die to draft it. Gain 1 Infamy by Raiding Ports, firing Cannons.</p>	<p>Hull</p> <p>Subtract your Hull Level from the number of Shots Fired at you by Cannons to determine the number of treasures stolen.</p>
<p>Raise Spirits</p> <p>When both squares are full, you may convert 1 drafted die to a 7 as you write it to your map, then clear the squares.</p>	<p>Fire Cannons</p> <p>Each cannon fires on the round it is completely filled. Pick a player and steal 1 treasure per Shot, minus their Hull Level, from 1 Chest. In addition, gain 1 Infamy equal to the lowest number in the cannon, then erase all numbers from it.</p>
<p>Fill Chests</p> <p>Each chest holds 4 dice maximum. Allocate dice to the lowest squares first. When attacked by Cannons, lose top squares first.</p>	<p>Raid Ports</p> <p>Each round, gain 1 Infamy equal to your Raided Ports level (1, 2, or 3) plus 1 if you have the highest sum of Raided Ports.</p>
<p>Bury Treasure</p> <p>Allocate all 3 dice here this round to bury a single Chest. Cross off the map below the chest to show it's buried. That chest is protected from Cannons but cannot be added to.</p>	<p>Hire Crew</p> <p>Add 1 Crew to the bag when reach you each Crew Level.</p>
